PH3C

Primary Health Care Classification Consortium

The PH3C supports the activity of the Wonca International Classification Committee (WICC) and his website.

This site gives access to the work published by the Committee since his creation in 1972. It will mostly provide information about the International Classification of Primary Care but also about other tools dealing with information retrieval in Primary Care.

The name "Primary Health Care Classification Consortium" has been chosen to support Wonca and WICC efforts in this domain, to diffuse information about WICC work, to gather people using WICC tools, to share research and field trials results and to seek support from all interested parties.

The website is also the main communication tool between WICC members. More than 50 members from 30 countries can communicate through a reserved access.

Access to ICPC repository on Kith web site

All about WICC

Ravello meeting 2013 - Issues, slides and countries annual reports

In 2013, the yearly meeting of the WICC took place in Ravello, Italy. Main topics of the meeting were the results of the address "quaternary prevention" from the WICC with WICC members by the WICC members. There were several presentations and a workshop on "quaternary prevention" by the WICC members. The WICC members also presented their work on "quaternary prevention" and "quaternary prevention" in their own countries. The WICC members also presented their work on "quaternary prevention" and "quaternary prevention" in their own countries. The WICC members also presented their work on "quaternary prevention" and "quaternary prevention" in their own countries.
