Wonca International Classification Committttee
Johannesburg Meeting, September 2013

Mike Klinkman, Chair

A simple data model for ICPC-3

"I thought ICPC was an idea whose time had come and passed."

Core content of primary care

- Requests for help

- Preventive care

- Managing problems (not just medical)

- Managing risk (risk factors)

- Function and well-being

- Personal goals and preferences

- Actions and interventions (the things we do)

- Communicating with other care givers

Core content of primary care

- Requests for help

- **Preventive care**

- Managing problems (not

- **Managing risk (risk factors)**

- **Function and well-being**

- **Personal goals and preferences**

- Actions and interventions (the things we do)

- **Communicating with other care givers**

Many of these areas do not fit in the episode of care framework.

STRUCTURE

Person:
  demographics
  social structure
  goals, preferences
  functional status (?)
Problem(s):
  RFE as starting point
  current/active
  severity
Clinical Modifiers (context):
  prevention
  risk factors
  significant events
Actions ("Process"):
  Decisions
  Interventions
  Plans
Time:
  Episode structure
Data import/export:
  Exchange protocols

A Primary Care Data Model
