

# HeTOP, crosslingual health terminology server: towards pragmatic applications

**Stefan J. Darmoni, MD, PhD & Julien Grosjean, PhD**

***Rouen University Hospital & LIMICS, INSERM U1142***

Email: [Stefan.Darmoni@chu-rouen.fr](mailto:Stefan.Darmoni@chu-rouen.fr) & [Julien.Grosjean@chu-rouen.fr](mailto:Julien.Grosjean@chu-rouen.fr)

# TOR Terminological and Ontological Resources

KOS Knowledge Organization System

Ontology  
Terminology  
Thesaurus  
Nomenclature  
Taxonomy  
Dictionary  
Lexicon  
List

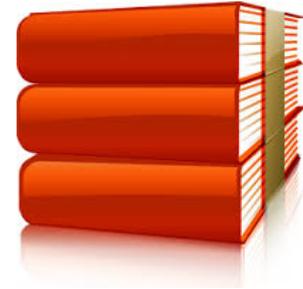

# TOR/KOS

CiSM<sup>e</sup>F

- To represent information & knowledge
  - Store
  - Describe
  - Structure
  - Annotate
- Information retrieval
  - Indexing / coding
- Fact inferencing
  - Rules=> computer-aided decision support systems
  - Reasoning
  - Subsumption (hierarchy)

# Roles of terminology servers

- Provide access to the main TOR/KOS in health
  - To humans
  - To computers (Web services)
- Diffusion of the main health terminologies
  - ICPC, ICD10 (11), CCAM (ICHI)
  - LOINC, ATC
  - MeSH
  - SNOMED CT

# Main (academic) terminology servers

- UMLS (USA)

- BioPortal (USA)\* -> instance francophone LIRMM

- Ontology Lookup Service (UK)

- LexGrid / NCI Term browser (USA)

- HeTOP (France)\* **HeTOP**

\* Grosjean J et coll. An Approach to Compare Bio-Ontologies Portals. Stud Health Technol Inform, 2014;205:1008-1012.

# HeTOP editorial policy

- Mixt approach: content (KOS)/container (server)
- Multi-terminology, with one pivotal terminology (MeSH)
  - For EHR and clinical applications, SNOMED CT = pivotal?
- Crosslingual with two pivotal languages (French/English) : *matricial navigation among languages & terminologies*
  - Systematic integration of KOS in French & in health (BNPC, CCAM, LPP, Cladimed, DRC, NABM, etc.) + French translations performed by others (WHO – ICD10, ICF-WONCA – ICPC2, ATC, LOINC, ICNP, etc.)
- Choice of KOS driven by academic or health information use cases (DRGs, EHR, documentary curation, information retrieval, real-time terminologies, primary care, rare diseases, etc.)
- Only last version
- Semantic enrichments: translations & mappings +++ (main added value of our team)

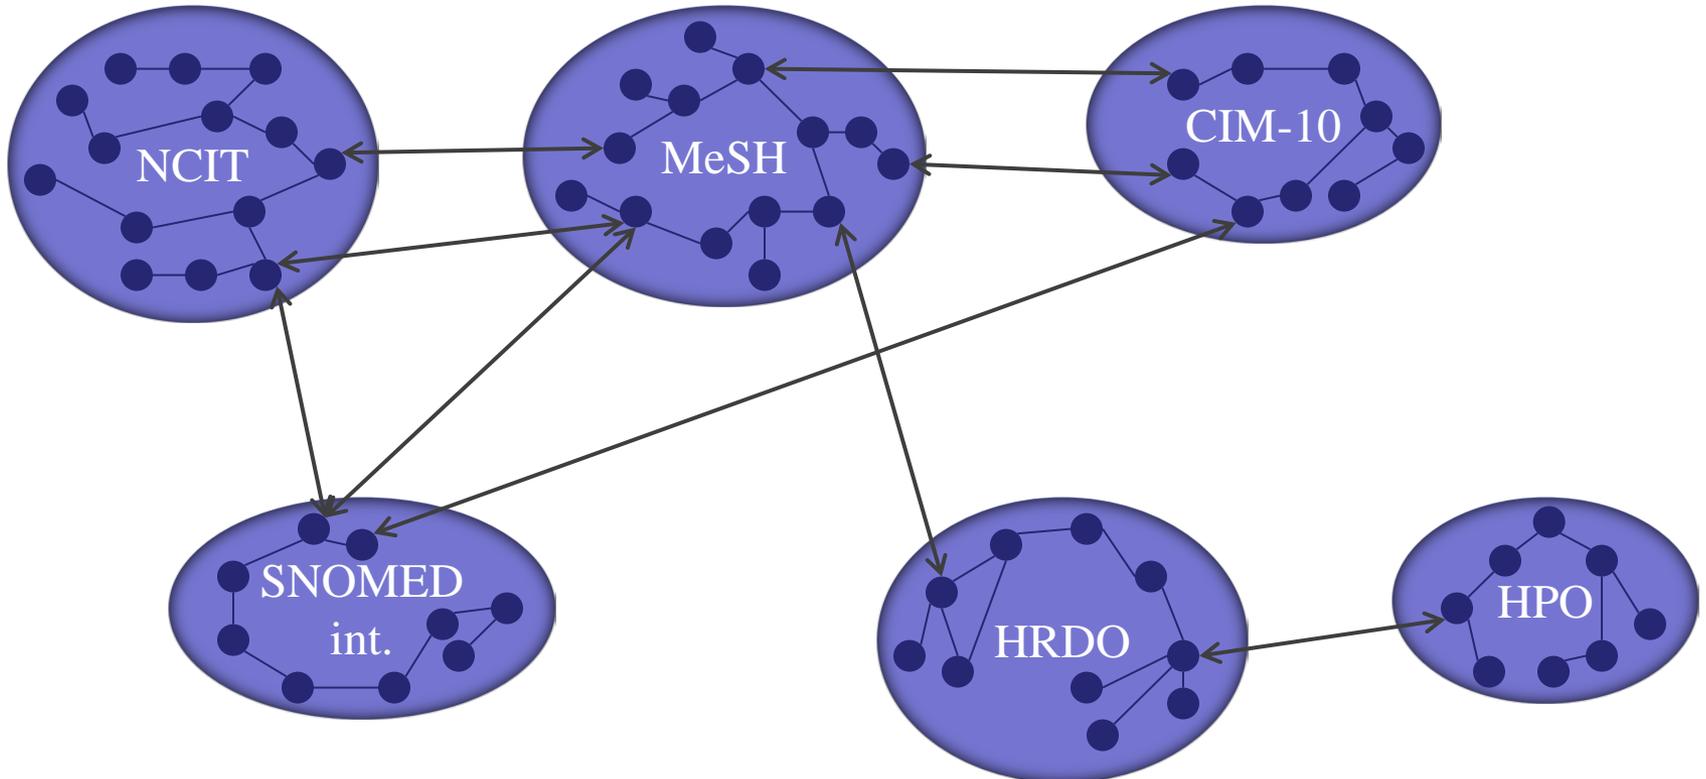

# HeTOP

- Health Terminology/Ontology Portal
- D2IM, CHU de Rouen – LIMICS
- URL : [www.hetop.eu](http://www.hetop.eu)
- 75 KOS, 32 languages
- Partially free (27 KOS); some others after authentication (ICPC2)
- Around 900 uniques machines per working day
- More than 2,800 subscribers
  
- Technologies :
  - Meta-model
  - BDD NoSQL since 2016

# Interoperability

- Interoperability of KOS & semantic network

- May 2017 : 314 000 supervision mappings, 58 000 manual mappings

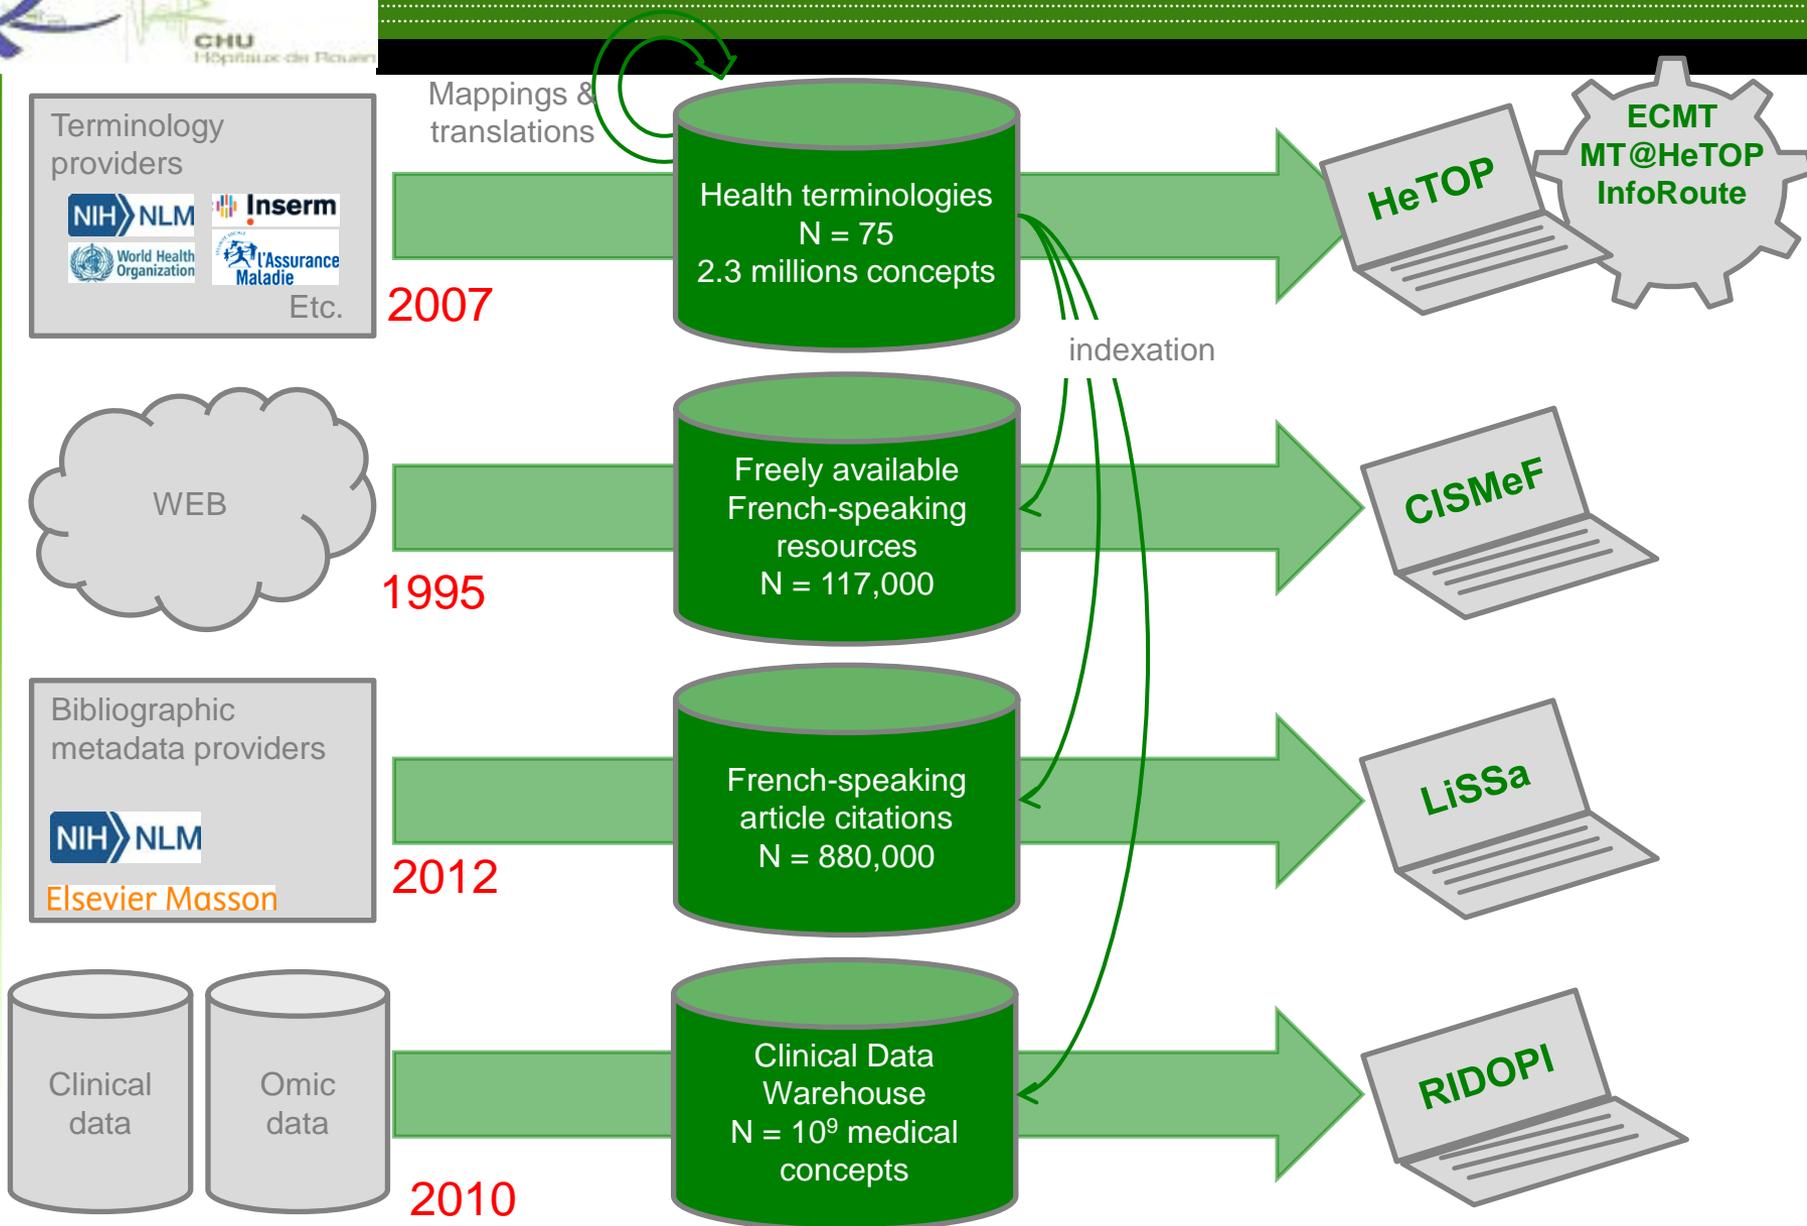

# Content

Terminologies	Concepts	Concepts in English	Concepts in French	Terms	Attributes	Relations
75 (17 UMLS)	2 538 595	1 885 880	1 267 074	9 982 113	15 966 667	9 965 417

- Overall, in HeTOP, the number of UMLS CUI with a least one French translation is  $\approx$  **388,900** vs.  $\approx$  **88,000** in UMLS (x4.42)
- 108 millions de triplets RDF en 2014 => Big data in health

# Semantic Web Plateform

CISMeF

# HeTOP use cases

- Terminology server chosen by the Rouen University Hospital since end of 2016
  - Interface terminologies mapped to reference terminologies (biology, imaging)
- HeTOP « instantiation »
  - Version DRG (simplified) for coding technicians (ICD10, CCAM)
  - Version Emergency to code « passage » (ICD10, SFMU)
- BDD HeTOP: terminological & lexical support to automatic indexing tool (commercialised by Alicante)
- Research projects (TerSan, SYNODOS, RAVEL, SIFADO, PlaIR2.018, C3-Cloud, ...)

# HeTOP use cases

CiSM<sup>e</sup>F

- Terminology server:
  - multi-terminological indexing (CISMeF, LiSSa)
  - Teaching support (students in medicine, information sciences)
  - SNOMED CT (cooperation with Prof. Lemoine, Hop. Erasme, Bruxells)
  - Support to maintain the French translation of MedDRA (ICH) during two years
  - Creation of KOS de novo
    - Q-Codes (Marc Jamouille, MD, PhD applicant)
    - Ontology in bioinformatics (OMICX startup)
  - ICPC2? (discussion with WICC)

# For practice

- No wildcard search

# HeTOP content

- HeTOP provides the usual data for each concept: preferred terms, original code, synonyms, definitions and other attributes, relations and hierarchies.
- Double (matricial) navigation:
  - among T/O
  - among languages
- Time consuming task > 20 man-years (to develop) + 2 man-years per year to maintain (integration & maintenance of T/O + mappings)
- Time consuming task to translate terminologies +++
- Several services on demand
  - access to other resources on the Internet (PubMed, CISMeF, etc.) through a French InfoButton (InfoRoute)
  - access to mappings tools (integrated in a beta version)
  - access to automatic indexing tool (ECMT)

# Methods & technologies (2)

CISMeF

- Oracle 11.1g (optimizations & partitioning) => NoSQL in 2015
- Java J2EE
- CISMeF APIs
- Apache Tomcat
- Infinispan cache layer
- Cross-browser (Vaadin framework)  
=> new framework in 2017 (INSA Rouen Engineering School)

# Croslingual Health Multi-Terminology/Ontology Portal

CISMeF

- First version before HeTOP (French & English)
- URL: <http://pts.chu-rouen.fr/>
- Access for humans and computers (Web services)
  - Since September 2010, daily used by CISMeF team to index manually and automatically Web resources
  - Since January 2011, MeSH is freely available (500 unique users per working day)
  - Teaching tool: Rouen Medical School (since Sept. 2010) to teach anatomy and rare diseases
  - Terminology auditing: HPO/Orphanet
  - T/O translations into French: FMA, HPO, SNOMED CT, MEDLINEplus
- Restricted access to the other terminologies (2,250 registred)
- Cooperation with BioPortal: Clement Jonquet & Mark Musen (ANR Jeunes Chercheurs: project SIFR)

# Three main terminology servers in health

## UMLS

- NIH, Bethesda (USA)
- Plus de 150 T/O
- Essentiellement en anglais
- La référence internationale pour la diffusion, mais pas pour la consultation

## BioPortal\*

- NCBO, Stanford (USA)
- Plus de 400 T/O (beaucoup en biologie, avec peu de concepts)
- Essentiellement en anglais (silo pour les autres langues)
- La référence pour poster une ontologie

## HeTOP\*

- SIBM, Rouen (France)
- 70 T/O en 32 langues
- La référence inter-lingue (navigation entre les langues) et dans le monde francophone

\* Grosjean J et coll. An Approach to Compare Bio-Ontologies Portals. **Stud Health Technol Inform**, 2014;205:1008-1012.

# HeTOP limits

CiSM<sup>e</sup>F

- Formal representation of complex clinical data structures = none
- Formal representation of physiological models = none
- Temporal relations = none
- Data quality = based on T/O quality and point of view
- Formalism & reasoning capabilities = none
- Collaborative editing/searching/sharing tools = collaboration with BioPortal to share tools (Clement Jonquet)
- T/O versioning = not yet provided by HeTOP
- Semantic resources distribution/dissemination processes = 56 T/O available in OWL format (latest version)/SKOS/RDF in several languages

# Other tools integrated HeTOP

- ECMT Extracteur de Concepts Multi Terminologiques
  - Able to extract health concepts from any text; e.g. discharge summary in ½ second (NoSQL)
  - Valorization with Alicante SME
  - Used in daily practice in the Catholic University Hospital of Lille, France; Dr. Arnaud Hansske; around one million discharge summaries indexed with ECMT
- InfoRoute, a French InfoButton
  - URL: [inforoute.chu-rouen.fr](http://inforoute.chu-rouen.fr)
  - Access to a contextualized knowledge based on semantic expansion based on manual & supervised mapping among terminologies
- MT@HeTOP, tool to perform automatic mappings & translations
- Generic semantic search engine
  - Doc'CISMeF (URL: [doccismef.chu-rouen.fr](http://doccismef.chu-rouen.fr)) on grey literature about health in French on the Internet ( $10^5$  resources)
  - LISSA (URL : [www.lissa.fr](http://www.lissa.fr)), a PubMed in French ( $0,7 \times 10^6$  citations d'articles)
  - RIDOPI, search engine in EHR ( $8 \times 10^6$  discharge summaries in Rouen; around  $10^9$  health concepts in these summaries;  $10^8$  numerical data in Rouen)

# Semantic harmonization: mapping, alignment

Three methods employed

URL: [http://cispro.chu-rouen.fr/MT\\_EHTOP/](http://cispro.chu-rouen.fr/MT_EHTOP/)

- Conceptual
  - Same CUI
  - Other relations: close match, BT-NT, NT-BT (SKOS)
  - On UMLS (n=17 included in HeTOP)
- NLP
  - More or less same algorithm of automatic indexing
  - Bag of words
  - on  $n*(n-1)/2$  T/O (included in the HeTOP)
- Statistical
  - Co-occurrence matrix
  - CCAM-ICD10; CCAM-LPP
