

Country Report from Japan

TransHis project finished. It is a good ICPC-2 coding EMR and some scientific papers are published related to ICPC. Due to reimbursement of medical fees in Japan, GPs does not welcome to use two systems, EMR and finance, at once.

We decided to lobby our Government again to adopt ICPC as standard for general practice.

In this year we are translating the latest version of ICPC2 in Japanese.

In the last annual meeting of Japanese Association of Primary Care, four GPs presented clinical analysis with ICPC2.
